

# RATING TOOLKIT

Unlimited Data Services

For those clients seeking an advanced, sophisticated, high speed throughput environment. With our all-in-one solution, Quadrant will help you develop further recognition for your brand and increase your ROI.

## Overview

Quadrant's Rating Toolkit™ will enable you to seamlessly integrate Quadrant's TopRate™ Engine into your existing applications with complete flexibility in data display and presentation. These features will allow you to drive more traffic to your site and ultimately deliver the power of choice to your consumers, through valuable and accurate information.

Our Rating Toolkit provides clients with the necessary licensing of our .NET objects and assemblies in order to access our data from within our rating database from your own applications. You will also gain the ability to handle advanced calculation queries

and high volumes of transactions seamlessly. With this arrangement, our technology and database resides on your internal servers and dramatically improves throughput and latency times for quick and immediate responses over the web.

Quadrant's Rating Toolkit allows you to control how to use our data – our technology and database wide reside on your servers for access to our rating engine, carrier library, and rating dataset, giving you the full power of information for all things insurance-related.

# How it Works

The Rating Library data files are binary files with compiled data to look up and rate companies the client has access to. These can be installed with a CD or downloaded using our Instant Update application. These files are line and state specific. QuadToolkit.DLL includes classes to get to get the list of companies (aka markets), zip codes, vehicles, variables and rates for the respective lines & states.

## FAQs

*What support services are available?*

We can setup online meetings to go over the toolkit object and sample project with your developers. As you start coding, we will assist with any questions you may have. \*\*Please note, We may require you to share their projects and results to debug any issues and/or help answer any questions.

*How long does it take to get set up?*

It usually takes client developers about a week to get familiar with the objects. Development time is usually pretty quick but allow 1-2 weeks to be up and running. We will help you with this process and provide timelines accordingly!

*How often are rates updated?*

We release new files with our updates (2-3 times per month). Our updates include new rating data files for rates updates for companies we have in our rating library and any enhancements for our rating objects. We send a notification email to our registered users when new files are available for download.

*What kind of reports can I run?*

Run reports for any of the 51 states, Home or Auto, using any carrier in our inventory and any combination of variables. We will provide sample reports to give you examples of different outputs.

*What is the process for delivery and installation?*

Quadrant shares the setup files (6-8 GB of hard disk space) to install our Instant Update applicaiton, which clients use to download the toolkit object and rating library files.

## Usage Cases

- Editorial Content
- Custom Reports
- Interactive Banner Ads
- Comparison Pricing Indicators
- Marektplace Data
